# Key Ideas: Butterflies

**Directions:** Read the text below about butterflies. Write information you learned by reading the text or looking at the pictures.

The butterfly is a flying insect with two wings and two antennae. They have three main body parts: the head, thorax, and abdomen. Butterflies have a long proboscis, or tongue, that they use to drink nectar from plants.

Butterflies come in many different colors and sizes. Butterflies live only around 40 days. Some butterflies only live for three to four days.

A butterfly starts out as an egg and grows into a caterpillar. The caterpillar then forms a chrysalis. Inside of the chrysalis, the caterpillar turns into a butterfly.

You can find butterflies anywhere in the world, except for Antarctica.
